

## Early Years Vision

**In Early Years at Lostock Hall Community Primary School we believe in providing children with safe, calm and stimulating environment where children can grow and flourish.**

**We work closely with our parents to ensure that all children build strong foundations to their learning journey in a happy and nurturing setting.**

**We strive to develop each unique child, by educating them with strong moral values, delivered through a knowledge and skills based curriculum. Their learning experiences are enhanced to enable progress through a variety of learning opportunities whether that is inside the classroom or outdoors.**

**We are committed to engage our children in practical learning experiences that enhance their personal development and well-being.**

**We set high expectations that challenge our children promoting their problem solving skills in all aspects of learning, which also encourages our children to become self-confident and self-aware. We all show respect for our school, ourselves and others.**
